Industrial Revolution: In history, the transition from handcrafted goods to machine-made goods

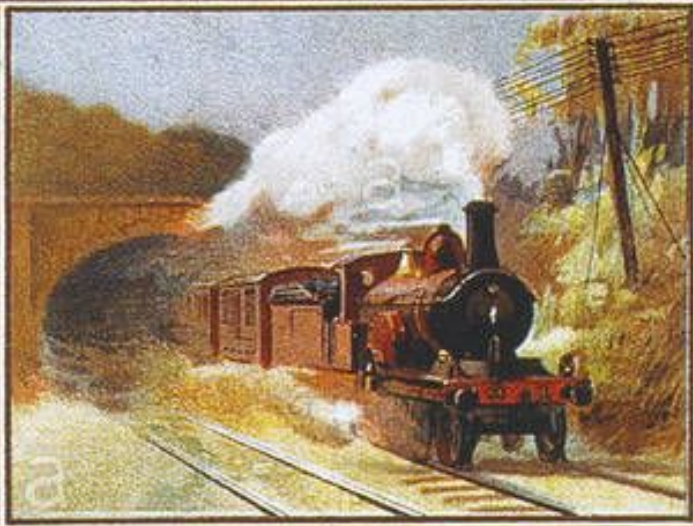

Part 1:

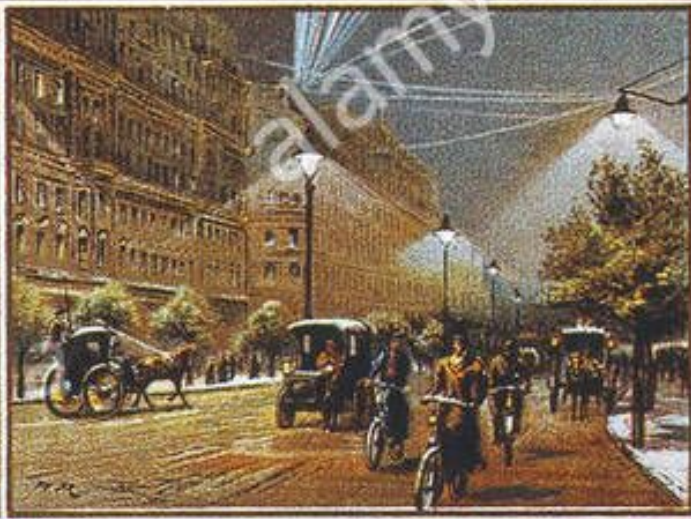

- **I want you to answer the questions about the painting.**

Three stylized, interlocking knot-like symbols or decorative motifs arranged horizontally.

1. **Industrial Revolution:** the era marked by the switch from the creation of goods by hand in the home to the creation of goods by machines in factories
2. **productivity:** a measure of how effective work is getting done
3. **mass production:** producing a lot of a good at a low cost
4. **capitalism:** economic system of private ownership of the means of production and people use profits to reinvest in their own business
5. **urbanization:** the growth of cities
6. **factory system:** the creation of goods in which workers, materials and machines are in one building
