

Earth Chemistry Unit Study Guide

You will have one class period to create a concept map showing what you understand from the unit.

Notes are allowed during the assessment.

Your concept map will be graded on:

- Detail
 - How well you show understanding of the subject
-

These are ideas I will look for when you create your concept map:

- Plate tectonics
- Mountain formation
- Volcanoes
- Rock types and how they form
- How do basic chemistry concepts apply to rock formation?
 - Melting
 - Freezing
 - Solutions
 - Crystallization
 - Precipitation
- How does water help create different rock types?
- Aquifers and groundwater
