# Go to:

#### https://www.onezoom.org/

Popular places to start exploring ...

Look at the options here.

Click on one.

Choose one species from the tree.

Click on it to open a Wikipedia entry.

Find out where it lives.

#### Example:

I chose the Inland Tailed Frog.

It lives in the northwest US and southwest Canada.

### Open your Google Earth project.

Navigate to a place your species might live.

### Click where you want the placemark.

## **Give it a title**

## Click. Add a fact about your species.

Save to project	>
- Place title	
Inland Tailed Frog ha	bitat
Add to project	
Mr. Bodson's Google	Earth Project 🔹
Edit place	Save

### Now it is part of your project!
